

Swiss Voting System Freedom of Voting

Header:

Nationwide election officials introduced to new Swiss voting System

Dear Sir or Madam,

Security, reliability and maximum efficiency are key issues on the mind of every election official

We, Swiss Voting System™, have taken the best of the accurate and reliable Swiss voting procedures and condensed them into a **compact and thorough report**. Like Swiss chocolate, Swiss army-knives, Swiss watches and other Swiss products and services, the Swiss voting system has stood the test of time. It is highly prized by the people of Switzerland who vote and elect 4 to 6 times a year.

The **Swiss Voting System Report** consists of samples, guidelines, tables, and cost calculations. In easy to read texts and figures, the report explains all the processes of an election including: paper ballot design, vote tabulation, cost calculations and proper transmission of election results. The guidelines are enriched with facts, figures, examples and facilities for implementation. The report also contains information on how to make the U.S. election procedures up to 10 times cheaper.

If a polling station complies with our standards, the polling station is allowed to use the "**Swiss Voting System Freedom of Voting™**" symbol. Wherever this symbol is present, voters can be assured that their votes will be accurately counted, processed, and reflected in the final election results. The voters will know: This Time "My Vote Counts."

Swiss Voting System focuses on developing and improving democratic voting systems on a global basis. Our report and guidelines are developed by a multicultural team composed of specialists from different backgrounds.
